

15:05:57 From Chatmaster (Brennain) to Everyone:
Good afternoon. Please feel free to introduce yourself here, and acknowledge the land and territory where you reside.

15:06:33 From Elaine Hughes to Everyone:
Elaine Hughes here – Treaty 4 area in east-central Saskatchewan, Canada.

15:06:50 From Julia Hansen to Everyone:
Hi! My name is Julia, attending from Wolastoqiyik unceded territory, known also as Fredericton, NB. Thank you all!

15:07:41 From Ann McAllister to Everyone:
Ann McAllister – grateful to live on unceded Wolastoq territory in Rothesay, NB.

15:08:14 From Lauren Clark to Host and Panelists:
Hello! My name is Lauren and I'm attending from unceded Mi'kmaq'ki, in Sackville, NB.

15:08:43 From Ann Pohl to Everyone:
Ann Pohl. Kitchissippi-Ottawa Valley Chapter of the Council of Canadians, living gratefully on the unceded, untreated territory of the Algonquin Anishinabeg. CNL is located in our chapter's region.

15:09:17 From Heather Ramsay to Host and Panelists:
Heather Ramsay, Kingston and The Islands, traditional territory of Haudenosone, Ojibwa, and Huron-Wendat peoples.

15:09:23 From Jiivan BlaisMathieu to Host and Panelists:
Jiivan (Dijiznikaz=is my name) on TdjotakgéHochelagaAnishnabe Territory socalled Montréal

15:10:37 From Jan Boudart to Host and Panelists:
Jan Boudart, board member of Nuclear Energy Information Service (NEIS). janboudart1@gmail.com, Chicago, IL

15:10:44 From vicki obedkoff to Everyone:
Hi! Vicki Obedkoff, Inter-Church Uranium Committee and Educational Co-op (ICUCEC), Saskatoon, living gratefully on Treaty 6 Territory and the Homeland of the Metis Nation.

15:11:01 From Ingrid Alesich to Host and Panelists:
Ingrid Alesich of Treaty 4 which includes the city of Regina. Have BSc. Environmental Sciences and Ecology. Activist all my life against every stage of the nuke industry. Was lead researcher on the qualitative analysis of Uranium Mining Public Enquiries in Saskatchewan, University of Regina, published report 1984.
Also heavily involved in promoting connections to nature through Nature Regina.

15:11:09 From Joan Morningstar to Everyone:
Joan Morningstar – Residing at Mississaugi First Nation, Ontario 1.6 km from Blind River Nuclear Refinery which also does incinerator burns..

15:11:55 From Sarah Gabrielle Baron (she/her) to Everyone:
Sarah Gabrielle Baron. M'nidoo M'nissing, Anishinabek First Nation territory. Host, RADIOACTIVE podcast

15:12:11 From Marilyn Hay to Everyone:
Marilyn Hay, Kitchener Waterloo Chapter of Council of Canadians. Living on the unceded territory granted to Six Nations,

ancestral home of the Anishnawbe and Haudenosaunee.

15:13:49 From Helen Forsey to Everyone:

Hello from Helen Forsey – in St. John's NL at present, but also based in Ompah, ON, near where the Algonquin First Nations led an 8-month blockade of uranium "exploration" on their territory, I was honoured to be part of that blockade, which ultimately succeeded in stopping the plan.

15:14:13 From Johanna Echlin to Everyone:

Hi Johanna Echlin here. Spend summers on Ottawa River just downriver from Chalk River. This is unneeded Algonquin territory. Chalk River Laboratories is where CNL wants to build an above-ground mound to dispose of one million tonnes of radioactive waste one kilometre from the Ottawa River. We are doing all we can to stop this from happening.

15:14:53 From Joan Morningstar to Host and Panelists:

Can you post Gordon Edwards website Please

15:15:00 From Johanna Echlin to Everyone:

Spell check changed unneeded to unneeded – how ridiculous!

Sorry for not catching that right away.

15:15:16 From Johanna Echlin to Everyone:

Did it again. Seems I can't win

15:15:19 From Sam Arnold to Host and Panelists:

Sam Arnold, also on the unceded Wolastoqey territory. Susan said that Pt. Lepreau provides 30% of NB Power's output. Is that averaged output, or only when it is operating? At the moment the CANDU reactor is off-line for maintenance, which happens rather frequently. I suspect that the average output of the CANDU reactor is well below 30%.

15:15:22 From Chatmaster (Brennain) to Everyone:

Canadian Coalition for Nuclear Responsibility's web site is www.ccnr.org (Gordon Edward's web site)

15:15:54 From Garry Guild to Everyone:

Joan Green & Garry Guild Council of Canadians Fredericton Chapter, on unceded Wolastoq territory

15:16:18 From Chatmaster (Brennain) to Sam Arnold, Host and Panelists:

Good question, Sam. We'll get back to you on that after the webinar.

15:17:47 From gracia janes to Everyone:

Greetings from Niagara, –Gracia Janes, representing the National Council of Women of Canada and Provincial Council of Women of Women.

15:18:10 From Harald Wolf to Everyone:

I worked with some of the Chipewyan–Dene relatives of the people that packed those sacks from the mine to the airstrip. They told me the white people there had access to saunas and clean clothes, while the Indigenous people worked in the same dusty clothes.

15:20:48 From Janice Harvey to Everyone:

Janice Harvey, Fredericton, unceded Wolastoqey territory. Environment & Society Program, St. Thomas University.

15:26:55 From Sarah Gabrielle Baron (she/her) to Everyone:

thank you Gordon!!

15:27:30 From Simon J Daigle to Everyone:
Thank you Gordon. Simon (Montreal).

15:27:45 From Ian Pineau to Everyone:
Impressive summary; thank you Gordon

15:27:50 From Catherine Jones to Everyone:
Thank you Gordon. Great info

15:27:54 From Alexa Lerche to Everyone:
Thank you, very interesting!

15:29:47 From Mary Jane Williams to Host and Panelists:
I'm late. Will recording of this webinar be available?

15:30:09 From Chatmaster (Brennain) to Mary Jane Williams, Host and Panelists:
Yes, a recording will be available.

15:30:11 From Renée Turcotte to Everyone:
We do not see her slides if she has some

15:30:32 From Chatmaster (Brennain) to Everyone:
Lorraine is not using slides. Thanks for checking, Renee

15:31:31 From Harald Wolf to Everyone:
Harald Wolf joining from WSÁNEĆ lands on the West Coast.
I spent a decade in the uranium exploration industry as technician, prospector & geologist, including 3 years in Atlantic Canada – briefly in NB. Sadly, it took all those years to build the strong opposition I now have to nuclear power.

15:32:01 From Sarah Gabrielle Baron (she/her) to Everyone:
Serpent River flows straight into Lake Huron

15:32:23 From Ian Pineau to Everyone:
So much for any consideration of moving to Elliot Lake as a "Retirement Community"

15:32:26 From Chatmaster (Brennain) to Harald Wolf, Host and Panelists:
Thanks for sharing that, Harald

15:33:41 From gracia janes to Everyone:
Even better than usual Gordon, !! Gracia

15:34:44 From Leslie Chandler to Everyone:
Has there been research into cancer rates since Elliot Lake became a 'retirement community'? Say, over the past 20 years?

15:36:01 From Chatmaster (Brennain) to Leslie Chandler, Host and Panelists:
Thanks for your question, Leslie. Can you please post it in the Q and A section? Look for the tab just to the left of the chat tab.

15:36:24 From Gordon Edwards to Host and Panelists:
Correction: The Serpent River flows into Georgian Bay, which is contiguous to Lake Huron. The Serpent River system is about 58 miles long, with about 18 lakes along the way. In 1977–78 the Ontario government published a report saying that the entire Serpent River system was a biological desert because of chemical and radiological pollution from the mine tailings. There are about 250 million tons of radioactive uranium tailings in Canada, stored on the surface as a

finely ground sand somewhat like flour. Very mobile, especially since it gives off (exhales) radioactive radon gas which travels thousands of miles in the air and deposits radioactive polonium isotopes on the ground below. Also dust blowing spreads the source material.

15:36:57 From Leslie Chandler to Host and Panelists:

Yes, Brenain.

15:37:45 From Joan Morningstar to Everyone:

There should be a research into cancer rates since Blind River Refinery – Cameco started operations. I am in remission – lung cancer.

15:37:51 From Gordon Edwards to Everyone:

Correction: The Serpent River flows into Georgian Bay, which is contiguous to Lake Huron. The Serpent River system is about 58 miles long, with about 18 lakes along the way. In 1977–78 the Ontario government published a report saying that the entire Serpent River system was a biological desert because of chemical and radiological pollution from the mine tailings. There are about 250 million tons of radioactive uranium tailings in Canada, stored on the surface as a finely ground sand somewhat like flour. Very mobile, especially since it gives off (exhales) radioactive radon gas which travels thousands of miles in the air and deposits radioactive polonium isotopes on the ground below. Also dust blowing spreads the source material.

15:38:36 From Chatmaster (Brennain) to Everyone:

Correction, Gordon: the Serpent River flows directly in the North Channel of Lake Huron. Georgian Bay is quite a bit further east and south.

15:38:55 From Gordon Edwards to Everyone:

Thank you Brennain

15:40:51 From Ann Pohl to Everyone:

WORD! YES! Mystification and telling us we can't understand!

Yes! That is a major blocking tool here close to CNL and I also heard it being used by the industry re: the DGR in South Bruce. "Be careful, this is a very complicated area and you need to know the full science to have a valid opinion."

15:41:27 From Sam Arnold to Host and Panelists:

Question for Gordon. Was uranium used to illuminate the face of watches? I was given such a watch in 1963 and then was told not to wear it because of its nuclear content. Thanks, great presentation!

15:41:40 From Harald Wolf to Everyone:

Probably the most frightening aspect of nuclear materials and waste is the invisibility of it. As Gordon said, you don't know what you're exposed to without uncommon and expensive instruments. I found a subdivision outside Bancroft, Ontario that was built on radioactive tailings!

15:43:06 From Janice Harvey to Everyone:

The author of Electric Empire, just mentioned by Lorraine, is Paul Mackay (McKay?), not Peter.

15:43:44 From Sarah Gabrielle Baron (she/her) to Everyone:

Lorraine's friend, Joan Morningstar, lives in the next First Nation reserve next to the West, Mississaugi First Nation. please visit Say No To Cameco on Facebook to see the fight to shut down the

Cameco uranium refinery and incinerator poisoning her community.

15:43:44 From Joan Morningstar to Everyone:

Blind River Refinery – Cameco started in 1982. Cancer rate is more common in this area now. What I really want to see is a research in cancer and other illness related to this toxics from Cameco especially to the incinerator burning.

15:45:02 From Alison Lam to Everyone:

Lorraine! 🙌🙌🙌 So very powerful and moving. Thank you for sharing your personal experiences! Your words are so profound.

15:45:08 From Chatmaster (Brennain) to Everyone:

Excellent point, Joan. And Mississauga First Nation had Dr. Rosalie Bertell do a health study in the 1990s (or was it the 80s?) so there is a baseline to work from.

15:45:17 From Lauren Clark to Host and Panelists:

Thank you Lorraine

15:45:21 From Joan Morningstar to Everyone:

Miigwechiwenimin Lorraine!!

15:45:52 From Corrina Serda to Everyone:

Thank you so much for sharing your experiences and wisdom, Lorraine! 🙌

15:45:52 From Marie-Claire Faray to Host and Panelists:

This conversation is very important as the Disarmament / Environment campaigns movements often avoid the issue of nuclear mining for nuclear energy used in electricity in Europe. The same as cobalt used for electric car is not clean energy as the mining of cobalt is damaging the environment and health of populations in the DRCongo where I live. Thanks

15:46:21 From Ann McAllister to Everyone:

Thank you, Lorraine.

15:46:28 From Ann McAllister to Everyone:

Thank you, Gordon.

15:46:32 From Elaine Hughes to Everyone:

Mass destruction of environment = ECOCIDE; attempts being made currently to add it as the 5th crime at the International Criminal Court – Elaine Hughes

15:46:33 From Catherine Jones to Everyone:

Lorraine. That was one of the most powerful talks I have listed to in years. Miigwetch

15:46:55 From Sarah Gabrielle Baron (she/her) to Everyone:

Sprott (and Cameco) are stockpiling uranium and forcing the prices higher RIGHT NOW

15:47:22 From Chatmaster (Brennain) to Everyone:

Back to Janice's point about Paul McKay's book: it is "Electric empire: The inside story of Ontario Hydro Paperback – Jan. 1 1983

by Paul McKay".

15:47:45 From Joan Morningstar to Everyone:

Yes, Dr. Rosalie Bertell did do health study; I am trying at this time to get a copy of her report. Do you know where I could get a copy?

15:47:59 From Alexa Lerche to Everyone:

Thank you very much as well!

15:48:37 From Rodrigue Hebert to Host and Panelists:

The Q&A prompt does not open for me. Don't know if is a general issue.

15:49:10 From Chatmaster (Brennain) to Everyone:

Joan, I think Dr Bertell's health study was included in Misssauga First Nation's background documents they filed as part of their intervention in the Blind River uranium refinery relicensing. I will check on that and get the link to you after the webinar.

15:50:22 From Chatmaster (Brennain) to Rodrigue Hebert, Host and Panelists:

Sorry to hear that Rodrigue. Please post it as a question in the chat to only the panelists and Susan and I will do our best to have it included.

15:51:51 From Chatmaster (Brennain) to Host and Panelists:

Gordon, when you answer the questions by typing I don't think they remain available for upvoting.

15:53:05 From Joan Morningstar to Everyone:

Thank you

15:55:47 From Jiivan BlaisMathieu to Everyone:

Looking forward that the video archive of this webinar will be available to look at including the chat, to share around for example witha OCAA (Ontario Clean Air Alliance) platforms

15:59:52 From Harald Wolf to Everyone:

In 1978, I was sent to negotiate a land access agreement with a young couple somewhere near Fredericton that had "fled" Ontario to get away from the environmental destruction there. I tried to explain to them that a uranium exploration company had acquired the mineral rights to their land. They were devastated! It was probably the hardest job I ever had, and very much started my reconsideration of what I might do with my life.

16:00:13 From Ann Pohl to Everyone:

Joan Morningstar, if Brennain comes up empty-handed, I have contacts that might have a paper copy of that Bertell study. Email me to remind to try for you: ann@openflows.net

16:00:25 From Sarah Gabrielle Baron (she/her) to Everyone:

when Joan Morningstar told Cameco and the Canadian Nuclear Safety Commission CNSC about the cancers in her community, two "experts" immediately told her that "cancer is normal". Please visit Say No To Cameco on Facebook

16:00:28 From Alexa Lerche to Everyone:

Thank you!

16:01:21 From Marc Fafard to Everyone:

thank you for good words. Marc Fafard, Sept-Iles Sans Uranium. Bon in Shippagan and dis m'y High Cool in Grand Falls N-B. wé did about the same thing in Québec To et à simili moratoriun in 2015. bravo

16:01:47 From Chatmaster (Brennain) to Marc Fafard, Host and Panelists:

Great to see you, Marc!

16:01:49 From Gordon Edwards to Everyone:

Sam Arnold – it was RADIUM that was use to illuminate watch dials not uranium – but as I said, every atom of radium started out as an atom of uranium! These watches are very dangerous.

16:02:01 From Sarah Gabrielle Baron (she/her) to Everyone:

Ann Pohl I captured your email. I will email you soon.

16:02:07 From Marc Fafard to Everyone:

sory french clavier and corector

16:03:10 From Helen Forsey to Everyone:

Important to note that uranium "exploration" is a big scam in which large pots of government money/tax benefits etc are made available to companies who "explore" in order to get that money. In the process they disturb or destroy the environment, atmosphere and water table, releasing radon and other radioactive progeny. The governments are actively promoting this even where the ore is way too low-grade to be "worth" even digging up!

16:03:32 From Robert Read to Host and Panelists:

Please make three little dots appear at lower right of chat so we'll be able to download it. Very important !

16:03:59 From Marilyn Hay to Everyone:

Will a recording, copies of the slides, and the chat be available?

16:04:39 From Chatmaster (Brennain) to Robert Read, Host and Panelists:

Thanks, Rob. I don't think we can change those settings while in session. Do you not see the dots right now?

16:05:09 From Jiivan BlaisMathieu to Everyone:

Will there be a video available of the Webinar to view later including the chat

16:05:10 From Ian Pineau to Everyone:

Please tell me you are kidding; they sell radioactive fertilizer! WTF!

16:05:10 From Chatmaster (Brennain) to Everyone:

A recording will be available in a few days, Marilyn.

16:05:11 From DAVid Robinson to Host and Panelists:

I am a pro-nuclear Green and I am concerned about the careless arguments – Nickel mining and gold mining do the same damages. Lung cancer 60s too. Of course heavy smoking among miterers is as cause of more cancers. Agriculture and oil do far more environmental damage and are heavily subsidized. There facts is that nuclear power generation is the least environmentally damaging source we have. Holding the standards of the 1950s and 1960s against projects proposed for the 2030s seems a bit unreasonable.

16:06:47 From Chatmaster (Brennain) to DAVid Robinson, Host and Panelists:

Dave, the effects are not the same. You are entitled to that opinion, I suppose, but it's your opinion.

16:07:42 From Sarah Gabrielle Baron (she/her) to Everyone:

You can hear about Port Hope from my podcast with Fay Moore

here <https://anchor.fm/sarah-gabrielle-baron> or search RADIOACTIVE on Spotify or Google Podcasts

16:10:26 From Marc Fafard to Everyone:

arrond Sept-Iles, we art à mining paid town. Uranium was not welcomed. 90% against. thé élément is vers important and Uranium has the worst réputation of them all.

16:11:59 From Anna-Marie MacKinnon to Host and Panelists:

I want to thank everyone involved with this webcast for this presentation. I know that usually most attendees to things like this are already in agreement, but I'd previously been excited about another reactor at LePreau (I'm in Saint John) It never occurred to me to wonder where the uranium would be coming from.

16:13:32 From Dale Dewar to Host and Panelists:

Joseph Mangano, the epidemiologist, did comparisons on the health of children around nuclear power plants to children without nuclear reactors. He was interviewed by Nuclear Hotseat. Google his work.

16:13:37 From Anna-Marie MacKinnon to Host and Panelists:

LePreau is on a fault line, too.

16:15:02 From Ingrid Alesich to Host and Panelists:

If the kind of rain BC just received, happens over those tailing ponds, near Elliot Lake, they will all breach their walls. Human structures are flimsy toys to Climate Change.

16:18:05 From Wendy Phillips to Everyone:

Uranium mining promotion by Premier Moe in Saskatchewan now

16:18:24 From Robert Read to Host and Panelists:

No, the dots are not there. If you can't provide them while in session, please download and save them yourself, so that they can be sent out in the email.

16:18:57 From Ingrid Alesich to Host and Panelists:

We had a major tailings pond rupture at Key Lake in Saskatchewan, back in about 1983. I was involved in raising public awareness of the radionuclides being released into the surrounding ecosystems. I received a threatening phone call telling me to keep quiet. I did not keep quiet. The Conservatives were in power in Sask at that time.

16:19:20 From Chatmaster (Brennain) to Robert Read, Host and Panelists:

Thanks, Robert. We'll do that, and the webinar host will also have access to them when the session closes. Good suggestion.

16:19:46 From Lorraine Rekmans to Ingrid Alesich, Host and Panelists:

Yes they are bullies and try to threaten and harass you into silence

16:20:49 From Helen Forsey to Everyone:

Highly recommend everyone check out the website of Mining Watch (<https://miningwatch.ca/>) who are doing fine work exposing such outrages in Canada and elsewhere.

16:22:28 From Lise Auffray to Everyone:

Thanks, that would be great!

16:24:14 From Harald Wolf to Everyone:

I have visited scores of abandoned uranium exploration sites across Canada and specifically seen many drill pipes and adits in Bancroft, Ontario and Labrador with radioactive water flowing out.

16:25:04 From Joan Morningstar to Everyone:

Would Lorraine have Dr. Bertell reports?>

16:26:27 From Joan Morningstar to Host and Panelists:

Would Lorraine have Dr. Bertell's reports and could Lorraine share the report?

16:26:38 From Ingrid Alesich to Host and Panelists:

What happened to the plan to move highly radioactive waste from Ontario to northern Saskatchewan. We have the current problems..very little talk of Saskatchewan now. uranium City was closed because 70% of workers were suffering all kinds of illnesses caused by radioactive contamination.

16:26:49 From Chatmaster (Brennain) to Everyone:

Dr. Bertell's watershed book was "No Immediate Danger: Prognosis for a Radioactive Earth" published in 1990. Still one of the best resources around for understanding the effects of radiation, including low levels of exposure.

16:27:14 From Jan Boudart to Host and Panelists:

"No immediate danger" and "Planet Earth, the latest weapon of war". Books by Rsalee Bertell.

16:27:42 From Helen Forsey to Everyone:

This whole ongoing nuclear story is such a horrendous example of the false notion that "man" can control everything. I call it the patriarchal illusion of control, and it is killing us and all our relations.

16:27:55 From John Reist to Everyone:

the cold war is over and the poliferation of nuclear weapons is over with reduction of warheads through the SALT 2 agreement.

16:27:55 From Harald Wolf to Everyone:

HEAR, HEAR, GORDON EDWARDS!!!

16:27:58 From Marc Fafard to Everyone:

i world sa To everybody To write "open lettre or opinions" in your local papers. lire was Saïd before, the kids don't no about the issue! et to your pencils.

16:29:08 From Chatmaster (Brennain) to Everyone:

Ingrid, the Nuclear Waste Management Organization investigated 22 communités as possible nuclear waste burial sights, including 3 in Saskatchewan. They are now shortlisted to two: South Bruce, Saugeen Ojibway Nation territory in southwestern Ontario, and an area between Ignace and Dryden in Treaty 3 in northwestern Ontario. Go to www.knownuclearwaste.ca for more info.

16:29:19 From Marc Fafard to Everyone:

thank To Gordon , Suzanne and ôther présenter and organisers. thé industriel and gouvernement Will alias screw us for mining money.

16:29:32 From Heather Ramsay to Host and Panelists:

The nuclear industry is very active in the media and has fooled many people.

16:29:32 From Joan Morningstar to Host and Panelists:

I am interested in one of Dr. Bertell Report that she done for Mississauga First Nation. She did a health study for our community because our community is 1.6 km from Cameco

16:29:48 From Augustin Bazangeya to Host and Panelists:

Thank you Gordon

16:30:05 From Ann McAllister to Everyone:

Thank you so much, Gordon, Lorraine, Tracy and Susan, for information we can act upon.

16:30:11 From Sam Arnold to Host and Panelists:

Thank you Gordon for your final message today opposing uranium use for nuclear weapons!

16:30:14 From Heather Ramsay to Host and Panelists:

I don't know. What about the blue needed necklace with the silver pendant?

16:30:16 From Marc Fafard to Everyone:

it's about Canada's job in the world.

16:30:24 From Joan Morningstar to Host and Panelists:

thank you Lorraine!!!!!!

16:30:47 From Heather Ramsay to Host and Panelists:

Sorry, wrong chat!

16:30:52 From Gordon Edwards to Everyone:

To DR - You are correct that there are a lot of polluting industries around. The problem with nuclear power is that the wastes are indestructible human-made elements, many of them radioactive varieties of otherwise non-radioactive elements, but when the two are mixed they become inseparable so that ordinary materials become radioactive. Materials. This represents an irreversible degradation of the environment and these materials do end up in every nook and cranny. Look at the report by the Ontario Royal Commission on Electric Power Planning called A Race Against Time - Nuclear Power in Ontario. Or the Flowers Report from the UK, entitled Nuclear Power and the Environment. Both these reports were written by engineers.

16:30:52 From Chatmaster (Brennain) to Joan Morningstar, Host and Panelists:

Joan, I am going to look for that report for you in the Mississauga First Nation written intervention from the refinery hearing. I'll get back to you soon.

16:30:54 From Anne Runyan to Host and Panelists:

Getting Canada to ratify TPNW would also have implications for finances for mining and other such projects. See Rae Acheson's Banning the Bomb on the actions at local, national, international levels of ripple effects of ratification.

16:31:07 From Ann Pohl to Everyone:

Miigwetch and Thanks to all presenters and organizers. I needed to learn more about the mining end of this. And I did!

16:31:12 From Marc Fafard to Everyone:

they are letting stupid souliers or they profit from it!

16:31:36 From Wendy Phillips to Everyone:

Thank you for all of this information.

16:31:45 From Mike Nickerson to Host and Panelists:

Thanks Gordon, Tracy & Lorainne. Thought provoking.

16:32:14 From John Reist to Everyone:

Gordon Edwards is right you dont need Nuclear for Electric Power, we can use Coal and Gas. Nuclear Power is the carbon free and we have to get away from Fossil Fuels

16:32:34 From pippa feinstein to Everyone:

Thank you to all presenters and organizers for this important and very appreciated panel event

16:32:40 From Elaine Hughes to Everyone:

Good job, everyone – thank you! – Elaine Hughes

16:32:52 From Chris Corey to Everyone:

Thank you to everyone. The problem is much worse than I knew. I feel much worse now.

16:32:59 From Lise Auffray to Everyone:

Thank you so much for all the effort you all have put into this! So appreciated! Lise, from Moncton

16:33:00 From Heather Ramsay to Host and Panelists:

Thank you all.

16:33:00 From Rodrigue Hebert to Everyone:

Merci Beaucoup! Have a great weekend

16:33:01 From Sarah Gabrielle Baron (she/her) to Everyone:

please visit Day No To Cameco on Facebook
